

## The Antimicrobial Testing Program

### Hospital Disinfectant and Tuberculocidal Products Tested or Pending Testing

**August 21, 2014**

The agency has completed testing of the majority of registered hospital disinfectants and tuberculocide products. The following list of products can assist users in making informed choices regarding infection control in their facilities. The EPA or state contract laboratories performed the product testing. **The listing of these products is not a government endorsement of any particular product or any particular type of product, but is merely a listing of hospital disinfectant products.**

This list consists of the following groups:

**Agency Confirmed Efficacy** - Includes products that have passed ATP testing by the agency's lab and are confirmed as efficacious hospital disinfectants.

**Agency Taking Action** - Includes products under EPA deliberation, including undergoing testing or review, or taking regulatory or enforcement action.

**No Post-Market Testing by EPA**— Now Includes products labeled for use in dialysis facilities, newly registered products that have not yet undergone post-market testing and registered products that were not in production at time of collection.
