Company Directory

3M Pharmaceuticals

St. Paul, MN 55144
(800) 364-3577
(651) 736-2610
pharma@mmm.com
www.3m.com/pharma

3M Pharmaceuticals specializes in aerosol respiratory medicine, particularly in the development of metered dose inhalers (MDIs) for treating asthma. 3M pioneered and introduced the portable MDI in the 1950s and introduced the first breath-actuated inhalers in 1993. 3M launched the first CFC-free inhalers without ozone-depleting propellants. More than half of all the inhalers in the world today use 3M components.

3M™ Littmann® Stethoscopes

Building 275-4E-01
3M Center
St. Paul, MN 55144-1000
(800) 228-3957
healthcare@3m.com
www.3m.com/littmann

The Littmann brand assures unsurpassed quality and is known for precision, acoustical superiority, innovative design, and exceptional performance. 3M offers you a wide variety of stethoscopes to meet your auscultation needs.

A-M Systems, Inc. manufactures a broad range of high-quality products to meet the changing needs of today's health care and bio-medical research and teaching organizations. Since 1976, A-M Systems, Inc. has been committed to promptly and economically providing our customers with the highest quality products including mouthpieces, filters, tubing, adapters, connectors, absorbents, and chart-recording supplies. Most of our products are kept in stock at all times for same day

shipping. Free samples of most of our products are available.

Abbott Point of Care

104 Windsor Center Dr.
East Windsor, NJ 08542
(800) 827-7828
marketing@i-stat.com
www.i-stat.com

i-STAT develops, manufactures, and markets diagnostic products for blood analysis that provide health care professionals critical diagnostics information accurately and immediately at the point of patient care. i-STAT is a division of Abbott Laboratories.

AccuTest

P.O. Box 999
Westford, MA 01886
(800) 665-2575
(800) 665-5949 Fax
info@accutest.org
www.accutest.org

AccuTest's proficiency testing programs fulfill CAP, COLA, JCAHO, and CMS/CLIA external QA requirements. Blood gas labs receive performance evaluations within 48 hours to help ensure positive patient outcomes. AccuTest's PT program is the second largest in the U.S. and features a nationwide database of more than 600 blood gas and CO-oximeter instruments. AccuTest's programs are supported by DigitalPT, a web-enabled informatics platform that provides real-time e-mail and fax alerts, online graphical reports, and archival access to past test events.

Company Directory

Advanced Medical Technologies, Inc.

P.O. Box 22558
Cleveland, OH 44122-0558
(216) 283-1010
(216) 991-8806 Fax
cardiocare@mindspring.com
www.cardiocare.home.mindspring.com

Advanced Medical Technologies distributes and markets cardiocare stethoscopes that are practical for high-noise environments. Its PVC tubing is centered in the back of the head or chest piece, eliminating angles and facilitating increased auscultation. The diaphragm is designed to turn into a bell by using pressure. High- and low-frequency sounds can be clearly heard by using one side. Acoustical and amplitudinal tests confirm increased sensitivity and performance. Pediatric attachment available.

Advanced Respiratory, Inc.

(See Hill-Rom)

Aerocrine, Inc.

One Dag Hammarskjold Plaza
885 Second Ave., 45th Fl.
New York, NY 10017-2201
(866) ASK NIOX
(212) 810-2480
(212) 656-1723 Fax
info.us@aerocrine.net
www.aerocrine.com

Aerocrine develops solutions for the management of inflammatory diseases through measuring airborne markers, primarily exhaled nitric oxide. Aerocrine has developed the NIOX® Nitric Oxide Monitoring System. NIOX is the first device that is FDA cleared for routine clinical monitoring of inflammation in the airways of asthma patients and was developed in accordance with ATS guidelines.

Aerogen, Inc.

Contact AirSep today for a demonstration of our complete line of oxygen concentrators, oxygen conserving devices, and pulse oximetry systems. AirSep multi-option concentrator and other products for the home, hospital, and clinical environments are sold in more than 100 countries throughout the world.

Airsonett, Inc.

801 E. Morehead St., Ste. 305
Charlotte, NC 28202
(704) 376-8200
(704) 332-3771 Fax

info@airsonett.com
www.airsonett.com

A breakthrough for allergy, asthma, and respiratory sufferers, the Airsonett Airshower™ minimizes the risk of cross contamination of germs and bacteria and helps reduce the risk of airborne infection. It is the first air purifier to deliver "clean room" directly to a patient's breathing zone within three minutes for faster relief and comfort. In less than 60 minutes, an entire room is purified. Airsonett is a sister company to Airson AB, who has been designing ventilation systems for industry since 1983.

Airway Labs

4264 W. Lovers Ln.
Dallas, TX 75209
(888) 648-3827
(214) 995-6250
(214) 352-2664 Fax
info@airwaylabs.com
www.airwaylabs.com

Airway Labs is the largest and original production facility of the TAP, an oral appliance similar to an athletic mouth guard. Developed with advanced dental technology, the TAP reduces sleep apnea-associated health risks without the need for surgery, medications, or other more cumbersome therapy. The TAP is based on the same principle as CPR. The unique design of the appliance allows the patient to have complete control over how far the mandible is advanced.

For 55 years, B. F. Ascher & Co. has been providing quality products for the pharmaceutical industry. Their OTC line includes saline nasal mist, drops, and gel; they also have neonatal nose spray/drops. These products are recommended by physicians to wash out allergens and keep the nose moist, helping patients breathe better. The gel is useful for patients on oxygen and increases patient compliance. Other Ascher products include cough lozenges, allergy relief medication, and an inhaler.

CLSI is a global, interdisciplinary, nonprofit, standards-developing and educational organization that promotes the development and use of voluntary consensus standards and guidelines within the health care community. It is recognized worldwide for the application of its unique consensus process in the development of standards and guidelines for patient testing and related health care issues. CLSI is based on the principle that consensus is an efficient and cost-effective way to improve patient testing and services. Also, CLSI provides an open and unbiased forum to address clinical issues affecting the quality of patient testing and health care.

Company Directory

Freedom Medical provides electronic medical equipment and related services to hospitals, alternate site health care providers, and EMS transport organizations. The company rents and sells its products and services primarily in four markets: hospitals, alternate sites, EMS transport, and medical dealer-equipment brokers. Established to assist health care providers in managing their medical equipment costs in a declining reimbursement environment, we offer our customers a "true" freedom of choice in their capital equipment needs. All equipment delivered by Freedom Medical is inspected by trained biomedical specialists. Documentation is provided with all equipment, which meets or exceeds Joint Commission standards.

Distributor of Sterillium® Rub Antiseptic, a brushless, waterless pre-operative surgical preparation exceeding FDA surgical TFM requirements. Pre-operative surgical hand preparation is completed in a simple two-minute application procedure. Proven in Europe for 40 years, emollients in Sterillium Rub prevent drying and skin irritation and provide for superior skin condition resulting in easy, rapid gloving and a non-sticky skin surface. Sterillium Rub may also be used as a healthcare personnel hand antiseptic product providing a rapid, reliable, and a more comprehensive spectrum of efficacy against bacteria and viruses than other hand sanitizer products. Hygienic hand disinfection is completed in 30 seconds. Sterillium Rub is fungicidal, bactericidal, tuberculocidal, and virus inactivating.

www.hearthugger.com

Heart Hugger, manufactured by General Cardiac Technology, is a sternum-support harness that provides patient-controlled pain management after thoracic surgery. Throughout recovery, Heart Hugger helps to give patients the confidence and willingness to do their deep breathing and coughing exercises needed to speed recovery. Whenever patients need to cough, breathe deeply, sneeze, or make uncomfortable movements, they take the handles in one or both hands and squeeze, holding the ribcage together with uniform encircling pressure, stabilizing their sternum while

providing pain relief. Heart Hugger is used by more than 200 leading heart hospitals in the U.S. and over 340 heart programs worldwide.

With 85 years of spirometry design and manufacturing experience, Jones Medical has established itself as a leader in the spirometry field. Our most popular product, a base station, utilizes a cordless 1-pound spirometer for optimum flexibility. A disposable sensor minimizes the need to sterilize hoses, recalibrate pneumotachs, or buy expensive bacterial filters. We also offer a spirometric calibration syringe, which can check your equipment's flow and volume accuracy. For the highest quality spirometry equipment, the widest selection calibration devices, and related accessories, respiratory specialists have relied on Jones products for years.

Medica manufactures completely automated, microprocessor-controlled analyzers using current ISE technology. Medica's EasyLyte and EasyElectrolyte Analyzers measure various combinations of sodium, potassium, chloride, lithium, calcium, and pH in whole blood, serum, plasma, or urine. The Medica EasyBloodgas and EasyStat Analyzers also provide bloodgas analysis measuring pH, PCO₂, PO₂, Na⁺, K⁺, Ca⁺⁺ and Hct. Medica's products are specifically designed for the lower volume *in vitro* diagnostic testing market. They are unusually easy to operate and service. One-step, push-button operation significantly differentiates Medica's products from the competition.

Michigan Instruments provides a valuable tool — the TTL® Training & Test Lungs and PneuView® software — to the respiratory care industry, ensuring patient safety through simulation of actual human lungs. The system provides a broad spectrum of benefits, ranging from ventilator manufacturers validating the safety of their products, to therapists learning the ever-increasing complexities of ventilator operations, to biomedical engineers troubleshooting, resolving, and documenting difficult-to-recreate ventilator performance issues. The key to its long history of success is its ability to reduce patient risk by realistically duplicating clinical conditions in a non-clinical setting.

Sleep Solutions, Inc., provides technology and services for at-home diagnosis, therapy, and care management of sleep-disordered breathing, particularly obstructive sleep apnea (OSA). The privately held company provides physicians and their patients a clinically validated, cost-effective, accurate, and comfortable alternative to in-laboratory sleep studies at half the cost. The company's NovaSom QSG™ at-home diagnostic system employs proprietary sound analysis technology and is delivered directly to patients via an innovative operational network called MediTrack™. A wide array of physician and

consumer OSA resources are available through the company's web site.

Sleepmate® provides the sleep market with the widest line of FDA-approved physiological sensors used in diagnostic testing for sleep disorders. Our educational training consists of classroom as well as Web-based learning series. Both are designed to benefit new and experienced sleep professionals. Our goal is to partner with sleep professionals and patients to provide sleep products that are comfortable, easy to use, and reliable. Because without you, people don't sleep. And without sleep, people don't function well.

Transtracheal Systems is a medical device manufacturing company that specializes in the design and production of innovative oxygen therapy products. SCOOP oxygen catheters improve oxygenation, ambulation, and quality of life for patients requiring continuous supplemental oxygen. SCOOP catheters reduce resting oxygen flow rates 50 to 60 percent, while ensuring 24-hour-per-day compliance with prescribed oxygen therapy.
